# BROMO Platform

Hyperlocal Social Commerce + Points Economy Ecosystem

Project Scope, Commercial Terms & Complete Checklist

---

## 1. PROJECT OVERVIEW

### Project components

- Mobile App (React Native — iOS & Android)
- Admin Web Dashboard (Next.js + Bootstrap + TypeScript)
- Backend API (Node.js + Express + MongoDB)
- Store Web Micro-site — shareable store pages accessible without the app (Next.js; e.g. store.bromo.in/[slug] or agreed subdomain)
- Firebase Auth; media/files on AWS S3 (or equivalent on EC2/VPS as agreed)

### Commercial terms (development fee only)

| | |
|---|---|
| Total development cost | ₹ _____ |
| Timeline -2 months | Start: _____ End: _____ |
| Milestone 1 — Advance (on signing) | _____% = ₹ _____ |
| Milestone 2 — First draft (~1 month) | _____% = ₹ _____ |
| Milestone 3 — Handover & KT | _____% = ₹ _____ |
| Post-delivery support (included in dev fee) | 6 months — support end date: _____<br>Bug fixes for agreed scope; new features or changes quoted separately. |

---

## 2. DEVELOPMENT SCOPE VS ADMIN-MANAGED CONTENT

The deliverable is a complete, robust, dynamic platform: admin tools to configure feeds, moderation, content policies, feature flags, notifications, store/ad settings, and similar controls as listed in this document. Operational content—filter lists, audio/music libraries for reels, catalogued assets, legal copy, or any material that can be uploaded or toggled via admin—is **provided and maintained by the client/admin** through the admin panel. Development covers building those management capabilities and integrations; sourcing, licensing, or populating third-party libraries and day-to-day moderation content is not included unless explicitly stated elsewhere in writing.

---

## 3. COSTS NOT INCLUDED IN THE DEVELOPMENT FEE (BILLED EXTRA OR PAID BY CLIENT)

- All charges outside the fixed development fee: Firebase (or other BaaS) usage, OTP/SMS (e.g. Msg91), payment gateway fees, maps/APIs, email/SMS vendors, SSL where billed separately, test/staging servers, production domains, hosting, AWS S3/EC2 usage, and any external service subscriptions.
- Offline meetings, travel, lodging, or on-site visits are not included in the development fee.

---

## 4. CLIENT / ADMIN RESPONSIBILITIES (ACCOUNTS & COMPLIANCE)

The client shall provide, in a timely manner:

- A dedicated Gmail (or agreed) account for creating test/production Firebase projects, MongoDB Atlas (or equivalent), and other vendor sign-ups that require an email.
- Approved developer accounts for Google Play and Apple App Store (and related fees).
- Payment gateway merchant accounts as required.
- Domain(s), hosting/server access, and any test UAT environments as agreed.
- For OTP providers (e.g. Msg91) or Firebase/Google services: company registration, incorporation documents, and any KYC/compliance documents required by those platforms.

---

## 5. WHAT IS COVERED WITHOUT EXTRA DEV CHARGE

Anything **reasonably required for the platform to function** as per this agreement (core integrations, configuration hooks, standard auth/storage patterns, deployment wiring for agreed stack) is part of the development scope and will not be billed as a separate “small feature” fee, provided it aligns with the documented MVP. Discretionary enhancements, new modules, or scope expansion remain subject to separate agreement.

---

## 6. CORE PLATFORM FEATURES

**Social feed**
Posts, reels, stories; filters; collab posts; close friends; @mentions; category feed.

**Points economy**
Earn (watch/post); spend on ads/offers; coins → ads credits auto-convert.

**Voice & video calling**
1-to-1 in-app calls; WebRTC-based.

**Invite & earn**
Referrals with fraud/OTP safeguards.

**Hyperlocal stores**
GPS ~3KM discovery; store menu; coin redemption; store web link.

**Advertising**
Users & stores; points + cash hybrid; ad suggestions in feed/reels.

**Music library**
Admin-managed audio; usable in reels, stories, posts; reuse audio.

**Store subscriptions**

Basic / Gold / Premium tiers; onboard 3200 plan with ads credit fallback.

---

---

## 7. MOBILE APP — SCREEN CHECKLIST

Complete list of mobile app screens and behaviour.

### [Auth] Authentication & Onboarding (8 screens)

> **Splash Screen** — App logo, loading

> **Onboarding Slides** — 3–4 intro screens

> **Login** — Phone/Email + OTP; social login ready

> **Register** — Name, phone, email; OTP mandatory

> **OTP Verification** — 6-digit; resend timer

> **Forgot Password** — Recovery flow

> **Reset Password** — After OTP

> **Username Setup** — Mandatory unique username; auto-suggest available handles; shown during onboarding after OTP

### [Feed] Home & Feed (15 screens)

> **Home Feed** — Category + global; ad suggestions injected; autoplay video; filter/effects access button

> **Category Feed** — Food/Offers/Business/Lifestyle/Education/Local; ad suggestions per category

> **Reels Feed** — Vertical swipe; ad suggestions injected; watch & earn; use-this-audio button per reel

> **Stories Bar** — Horizontal; 24h expiry; close friends indicator

> **Story View** — Full-screen

> **Post Detail** — Likes, comments, share

> **Comments** — Nested; like replies; delete own

> **Share / Send To** — DM, apps, link

> **Create Post** — Media, caption, hashtags (#), @mention support, emoji-style inline tags (Instagram-style), location, category, music picker; consistent post-type styling

**Filter / Effects Selector** — AR filters and aesthetic effects for camera, stories, and reels; effects library managed via admin

**Close Friends Selector** — Choose close-friends list when posting a story; suggest close friends based on interaction

**Music / Audio Picker** — Browse and select track from music library for reel, story, or post; trending audio section

**Video Trim** — Trim video clip to desired length during reel/post creation

**Collaboration** — Tag a co-creator; post appears on both profiles (Instagram Collab-style); invite + accept flow

**Reuse Audio** — Tap audio credit on any reel to open Create Reel with that audio pre-loaded; original creator credited

## [Explore] Explore & Search (4 screens)

**Explore Home** — Search, trending, stores, categories

**Search Results** — Users, posts, stores, hashtags

**Hashtag / Category Detail**

**Nearby People / Friend Suggestions** — GPS-based user discovery; suggested friends nearby; follow directly from list

## [Stores] Nearby store module (14 screens)

**Nearby Store Home** — Map/list; 3KM; filters; sort

**Store Profile (1)** — Logo, cover, rating, distance, contact, offers

**Store Discount (2)** — Sliders, T&C, validity, menu link

**Offer Redemption** — Points + cash split; wallet

**Redemption Success** — QR, txn ID, OTP for store

**Store Registration** — GPS, map, docs upload; onboard plan payment (₹1,600 initial via payment gateway)

**Store Subscription Plans** — Basic/Gold/Premium

**My Store Dashboard** — Sales, reach, coins redeemed, active offers; item-level reach shown on each item card

**Create Store Offer**

**3KM Notification History**

**Store Menu** — Browse store's item menu (food, clothing, services, café, hotel etc.); item price + discount shown; coin redemption deducted at checkout

**Store Web Link / Share** — Shareable store profile link; opens store micro-site in browser; user can also share from app

**Store Reach Detail** — Store owner views reach stats per post/offer; item-level reach indicator shown on each item card in dashboard

**Store Coin Redemption** — Store sets how many coins accepted per visit and max redemptions per user per day; user sees live redemption limit

## [Ads] Advertising (7 screens)

**Create Ad — Step 1** — Type, placement

**Create Ad — Step 2** — Content, radius, audience

**Create Ad — Step 3** — Budget, duration, points + cash (min 50% cash)

**Ad Payment** — Gateway; wallet

**My Ads Dashboard**

**Ad Campaign Detail**

**Ad Earnings** — Watch points; daily limit

## [Profile] Profile & Wallet (13 screens)

**My Profile**

**Edit Profile** — Name, username (mandatory), bio, profile picture, website link

**Other User Profile**

**Share Profile** — Shareable profile link; QR code; share to other apps

**Followers / Following**

**Points Wallet**

**Transaction History** — User & store views

**Saved Posts**

**Watch History**

**Manage Content**

**Content Insights**

**Creator Dashboard**

**Referral Dashboard**

## [Communication] Notifications & Messaging (5 screens)

**Notifications** — Tabs; mark read

**Notification Settings**

**DM Inbox**

**Chat Conversation** — Text, image, post share

**Auto DM** — Admin-triggered automated messages (welcome on signup, store promotions, event alerts); user receives in DM inbox

## [Settings] Settings & Support (8 screens)

**Settings Main**

**Account Settings**

**Privacy Settings**

**Security Settings**

**Terms & Conditions**

**Privacy Policy**

**Help & Support**

**About App**

## [Calling] Voice & Video Calling (3 screens)

**Voice Call** — In-app voice call; mute, speaker, end call controls

**Video Call** — In-app video call; camera toggle, mute, end call; front/rear switch

**Call History** — Missed, incoming, outgoing call log; call back shortcut

## [Music] Music Library (2 screens)

**Music Library Browser** — Browse tracks by mood/category; search; trending audio section; admin-managed library

**Audio Detail** — Track info; reels using this audio; one-tap use for reel/story/post; original creator credit

**Mobile app total screens: 79+**
MVP scope as listed above.

---

## 8. ADMIN DASHBOARD — PAGE CHECKLIST

Web admin panel for platform management.

### [Auth] Admin authentication (3 pages)

**Admin Login** — Email/password; 2FA optional

**Forgot Password**

**My Account**

### [Overview] Main dashboard (1 page)

**Dashboard Home** — KPIs, charts, activity

### [Users] User management (5 pages)

**All Users List**

**User Detail**

**Add Sub-Admin**

**Admin Roles & Permissions**

**Banned / Suspended Users**

### [Content] Content moderation (6 pages)

**All Posts List**

**All Reels List**

**Reported Content Queue**

**Content Detail Review**

**Hashtag Management**

**Comments Moderation**

## [Stores] Store management (10 pages)

**All Stores List**

**Store Detail**

**Pending Store Approvals**

**Store Categories**

**Store Offers Overview**

**Subscription Management**

**Store Menu Management** — Add/edit menu items, prices; set discount % per item; applicable to all store types (café, hotel, retail, shoes, etc.)

**Store Coin Redemption Settings** — Per-store config: max coins per redemption, max redemptions per user per day

**Store Onboard Plan Manager** — Manage 3200-plan (₹1,600 now + ₹1,600 post-reach); auto ads-credit fallback if second payment pending; reach target tracking

**Store Web Link & Reach** — Assign store web URL slug; view item-level reach; reach stat shown on store dashboard and item cards

## [Ads] Advertising management (7 pages)

**All Ad Campaigns**

**Ad Campaign Detail**

**Ad Moderation Queue**

**Ad Revenue Overview**

**Ad Settings**

**Ads Credit Management** — View and adjust ads credit balances per user/store; manual allocation; auto-convert redeemed coins to ads credits

**Coins → Ads Credit Rules** — Configure conversion rate; set trigger conditions; audit log of conversions

## [Wallet] Points & wallet (6 pages)

- **Points Economy Overview**
- **All Transactions**
- **User Wallet Detail**
- **Points Settings**
- **Manual Points Adjustment**
- **Fraud Detection**

## [Analytics] Analytics & reports (5 pages)

- **User Analytics**
- **Content Analytics**
- **Store Analytics**
- **Revenue Reports**
- **Points Flow Analytics**

## [Config] App configuration (10 pages)

- **General Settings**
- **Maintenance Mode**
- **Feature Flags**
- **Feed Settings**
- **Reels Settings**
- **Nearby Store Settings**
- **Notification Templates**
- **Content Policy**
- **Auto DM Campaigns** — Create/manage triggered DM templates (welcome on signup, store promotions, event alerts); schedule and target rules
- **Mention & Username Settings** — Username availability rules; auto-suggest configuration; @mention notification toggles

### [UI/UX] Dynamic UI control (5 pages)

- **Banner Manager**
- **Home Layout Manager**
- **Onboarding Slides Editor**
- **Splash & Logo Manager**
- **Theme Settings** — Including AR filter / effects configuration where exposed in admin

### [Support] Support & legal (6 pages)

- **Support Tickets**
- **Ticket Detail**
- **FAQ Manager**
- **Terms & Conditions Editor**
- **Privacy Policy Editor**
- **Audit Log**

### [Music] Music library management (3 pages)

- **Music Library** — All tracks; upload, edit, delete; category/mood tags; toggle availability per content type (reel/story/post)
- **Track Detail** — Usage stats (reels/stories using this audio); enable/disable; copyright info
- **Trending Audio** — Curate trending tracks; set ranking; featured playlists

### [Calling] Call management (2 pages)

- **Call Logs** — Voice and video call history; duration, participants, status; moderation flags
- **Calling Settings** — Enable/disable calling per user tier; TURN/STUN server config; call recording policy

**Admin dashboard total pages: 69**

## 9. KEY PRODUCT NOTES

- **3KM notifications, QR+OTP redemption, store plans, category feed, watch & earn, referrals** — as described in sections 6–8.
- **AR filters & effects:** Included in development; configuration/toggles and asset management via admin as per implementation. Client supplies or licenses AR packs if third-party assets are required.
- **Real-money withdrawal to users:** Automated bank/wallet payout to end users is **not** in scope. Withdrawal requests are visible to admin; admin may record manual payouts / status as needed.
- **Language:** English UI for MVP. Full dynamic multi-language / i18n CMS is **not** included.
- **Voice & video calling:** In-app 1-to-1 peer-to-peer calls via WebRTC/TURN. Group calls and live streaming are not included.
- **Music / audio library:** Admin-managed track library; users pick audio for reels, stories, and posts. Licensing/copyright of uploaded tracks is client/admin responsibility. Original user audio auto-credited and reusable.
- **Collaboration posts:** Two users co-author a post; appears on both profiles. Invite + accept flow included.
- **Auto DM:** Admin-configured triggered messages (welcome on signup, store promotions). Delivered to user DM inbox.
- **Store onboard plan (3200 model):** ₹1,600 on sign-up; ₹1,600 after reach target. If second payment not made, store receives ₹1,600 in ads credits automatically.
- **Coins → ads credits:** Coins redeemed at coin store auto-convert to ads credits in user's ad wallet.
- **Store menu & discount redemption:** Any store type (café, hotel, retail, clothing, shoes, etc.) sets menu items with prices and discount %. Discount auto-applied at redemption; net payable shown before confirming.
- **Store web presence:** Each store gets a shareable web link (micro-site). Accessible without the app; shareable from within the app and externally.
- **Mention & username:** @mention in captions, comments, and stories. Username mandatory at registration; auto-suggest provided during signup.
- **Reuse post & reuse audio:** Reshare/reuse post to feed; tapping audio on any reel opens Create Reel with that audio pre-loaded; original creator credited.

---

## 10. OUT OF SCOPE (EXTRA CHARGES OR NOT OFFERED)

- Live streaming (real-time broadcast to many viewers; 1-to-1 calling is now in scope).
- Automated real-money withdrawal rails to users (manual admin handling may be supported as above).
- Dynamic multi-language / full i18n (English-only MVP).
- App Store / Play Store listing fees (client accounts).
- Licensing of commercial music for reels (client/admin content responsibility).
- AI recommendation engine (beyond basic configurable rules if any).
- Third-party product analytics (e.g. Mixpanel) — optional; client-paid.

---

## 11. DELIVERY & ACCEPTANCE CRITERIA

- All 79 mobile screens functional and tested per this document.
- All 69 admin pages functional with agreed CRUD/configuration.
- Points economy: earn → spend → redeem flows working; coins → ads credits auto-conversion working.
- ~3KM store discovery and notifications per spec.
- Store subscriptions with payment integration (client gateway); store onboard 3200-plan with ads-credit fallback functional.
- QR + OTP redemption with agreed fraud safeguards.
- Category feed and referral flows functional.
- Voice & video calling functional (1-to-1, WebRTC).
- Music library browser; audio selectable and usable in reels/stories/posts; reuse-audio flow working.
- AR filter/effects selector in camera for stories and reels.
- Close friends story posting functional.
- Collaboration (collab) post flow end-to-end; co-author invite + accept.
- Store menu management and coin redemption settings functional; user reach visible in store dashboard.
- Auto DM campaigns triggering correctly via admin; delivered to user inbox.
- @mention and username (mandatory + suggest) working in auth and content creation.
- Share profile link and store web link generated and shareable.
- Feature flags / admin toggles without code deploy where designed.
- Staging deployment; UAT sign-off before final milestone and KT.
- No open P0/P1 bugs at agreed delivery checkpoint.

---

## 12. PROJECT SUMMARY

| | |
|---|---|
| Mobile app screens | 79 |
| Admin pages | 69 |
| Total deliverables (screens/pages) | 148 |
| Development fee | **₹ _____ (milestones as in Point 1)** |

Timeline: 2 months (start–end dates as per Point 1). Post-handover support end date as per Point 1; new features quoted separately.

---

## 13. TECHNOLOGY STACK

**Mobile**

**Admin**

- React Native (iOS & Android)
- Firebase Auth
- Media/files: AWS S3 (or hosting on EC2/VPS per deployment)

- Next.js, Bootstrap, TypeScript
- Responsive layout

**Backend**

- Node.js, Express, REST
- JWT auth

**Data & infra**

- MongoDB
- VPS / AWS EC2, Ubuntu, SSL/HTTPS

**Approach:** Secure, scalable, configurable system; plain operational costs and third-party bills remain client responsibility unless otherwise agreed in writing.

---

## 14. PROJECT AGREEMENT SIGN-OFF

**Client**

Name: _____

Signature: _____

Date: _____

**Developer**

Name: _____

Signature: _____

Date: _____

This document is the complete scope for the BROMO MVP as agreed. Work outside this scope, including new features, pages, or integrations not listed here, requires a separate written agreement and additional fees. The fixed fee is as agreed and filled in Point 1 for development only; third-party services, travel, and Point 3 items are excluded unless prepaid or reimbursed as agreed. Final milestone instalment is due after handover, KT, and fulfilment of Point 11 acceptance criteria and client UAT sign-off, subject to cleared prior milestones.

---
